## ACKNOWLEDGEMENT

We the under signed , are greatly indebted to Dr. Farhin Hazarika, Assistant Professor, Department of Physics, Handique Girls' College for the constant persuasion, affectionate and efficient supervision at each and every stage of this project work. Her devotion and dedication in the academic field have certainly inspired us.

We are also grateful to Research Activities Cell, Handique Girls' College for providing financial support without which it would have been impossible to complete this project work.

*Nirmala Singh*  
( Nirmala Singh )

*Karavi Das*  
( Karavi Das )

( Nisha Pradhan )

# CONTENTS

|  | PAGE NO. |
|--|----------|
| <b>CHAPTER I</b>   |          |
| 1.1 Introduction   | 1        |
| 1.2 Review of some works   | 3        |
| 1.3 Aim and objective of the present work                              | 4        |
| <br><b>CHAPTER II</b>  |          |
| General introduction   |          |
| 2.1 Potato   | 5        |
| 2.2 Apple  | 8        |
| <br><b>CHAPTER III</b>   |          |
| Theoretical consideration  |          |
| 3.1 Electrical resistivity   | 11       |
| 3.2 X-ray fluorescence   | 12       |
| 3.3 Characteristic radiation   | 13       |
| <br><b>CHAPTER IV</b>  |          |
| Experimental   |          |
| 4.1 Experimental arrangement for studies of<br>electrical conductivity | 14       |
| 4.1.1 Samples  | 14       |
| 4.1.2 Sample preparation   | 14       |
| 4.1.3 Sample holder  | 14       |
| 4.1.4 Oven   | 15       |
| 4.1.5 Composition of potato  | 15       |
| 4.1.6 Measurement of electrical conductivity                           | 15       |

## **CHAPTER V**

|   |           |
|---|-----------|
| <b>5.1 Results : Composition of the samples</b> | <b>20</b> |
| <b>5.1.1 X-ray fluorescence studies</b>         | <b>20</b> |

## **CHAPTER VI**

|  |           |
|--|-----------|
| <b>6.1 Results and Discussions : Electrical Conductivity</b>               | <b>26</b> |
| <b>6.1.1 Conductivity in air at room temperature with time</b>             | <b>26</b> |
| <b>6.1.2 Variation of electrical conductivity with<br/>temperature</b>     | <b>27</b> |
| <b>6.1.3 Conductivity at different concentrations</b>                      | <b>38</b> |
| <b>6.1.4 Conductivity at different concentrations with<br/>temperature</b> | <b>41</b> |
| <b>6.1.5 Temperature versus time</b>                                       | <b>48</b> |

## **CHAPTER VII**

|   |           |
|---|-----------|
| <b>Conclusions from the present studies</b> | <b>51</b> |
| <b>REFERENCES</b>                           | <b>55</b> |
